

- It is important to become aware of what triggers you to start worrying
- What keeps worry going are beliefs (positive or negative) about worrying and unhelpful ways of coping with worry.
- What are some beliefs that you have about worrying?

<u>POSITIVE</u>	<u>NEGATIVE</u>

- What are some unhelpful strategies that you have used to manage your worry in the past?

- What are more helpful strategies that have worked for you in the past to manage your worry and/or you could try?

- Homework: When you notice worries, fill out the worry diary
Experiment with the “worry time” strategy
