

Worry Beliefs

Worry Shows That I am a Caring Person

Do I know caring people who don't worry as much as I do?

What else besides worry shows that I care?

Worry Helps Me to Be Prepared

Am I confusing worrying (in my head) with actually doing something (for example, actually solving problems rather than worrying about them?)

Do I know people who are organized and prepared who don't worry as much as I do?

Worry Motivates Me

Am I really more motivated when I worry?

Has worrying ever actually prevented me from doing the things I want to do? (for example, worrying so much about being healthy that you actually avoid the gym?)

Worry Protects Me From Negative Emotions

If something bad did happen, would I really not be as upset?

Has anything bad ever happened in my life? Did I really feel more prepared to deal with it because I worried about it?

Worry Prevents Negative Outcomes

Has anything bad ever happened in my life even though I worried about it?

Is there a way that I can test out my theory, by worrying one day and seeing what happens, and then not worrying another day?
